

# PANAVISION® DIGITAL TRANSFER STATION

The Panavision Digital Transfer Station (DTS) is designed to further enhance the workflow experience with the Panavision Solid State Recorder (SSR) used in conjunction with the Panavision Genesis®, Sony F35, and Sony F23. The station allows for realtime creation of uncompressed files, maintaining the uncompressed SSR workflow. It also provides the opportunities to simultaneously review the image, perform a preliminary quality control review directly on set, and generate an HDCAM SR® master. All of this with the ease of single button operation.

## KEY FEATURES

- Real-time creation of compressed or uncompressed files (DPX or QuickTime®)
- Simultaneous creation of an HDCAM SR master
- Non-disruptive to on-set production workflow
- Opportunity for primary QC directly on set
- Simple operation
- Ample storage

	DTS	DTS Lite
Uncompressed Files	DPX and QuickTime	N/A
Compressed Files	ProRes4444, ProRes422(HQ), ProRes422, ProRes(LT), ProRes (Proxy), DNxHD36*, DNxHD115*, DNxHD175*	
RAID Storage	14 or 28 TB RAID6	4 TB RAID5
Connections to transport hard drive	eSATA, FW800, FW400, USB2.0	
HDCAM SR Deck Control	Yes	Yes
Uninterruptible Power Supply (UPS)	Included	Optional
Reference Monitor	Included	Optional
